Time allowed: 2:15 Hours

Total Marks Sections B and C: 40

SECTION – B (Marks 24)

Q. 2 Answer any EIGHT parts briefly.

(8 x 3 = 24)

- (i) Discuss briefly psychological functions of food.
- (ii) What is meant by 'Nitrogen Balance'?
- (iii) What is meant by term 'Sponification'?
- (iv) How is Vitamin A measured? Also state its recommended allowances.
- (v) Name the deficiency disorders of Vitamin D.
- (vi) Discuss briefly the health benefits of Vitamin E.
- (vii) What are rich food sources of Vitamin B1?
- (viii) What are the functions performed by Niacin in the body?
- (ix) How can folic acid deficiency be prevented and treated?
- (x) Mention signs and symptoms of scurvy.
- (xi) Explain briefly the functions of iodine in the body.

SECTION – C (Marks 16)

Note: Attempt any TWO questions.

(2 x 8 = 16)

- | | | | |
|-------------|-----|--|------|
| Q. 3 | (a) | What is meant by 'Balance Diet'? | (04) |
| | (b) | What is the importance of balanced diet in relation to health? | (04) |
| Q. 4 | (a) | How can a food guide pyramid help in choosing a healthy diet? | (04) |
| | (b) | What causes goitre? Give signs and symptoms of goitre. | (04) |
| Q. 5 | (a) | How are proteins classified according to composition? | (04) |
| | (b) | Discuss the deficiency disorders of vitamin A in detail. | (04) |

SCIENCE FOR HOME ECONOMICS HSSC-I

(Pre-Home Economics Group)

12 B

Time allowed: 2:15 Hours

Total Marks Sections B and C: 40

Note: Answer any eight parts from Section 'B' and any two questions from Section 'C' on the separately provided answer book. Write your answers neatly and legibly.

SECTION – B (Marks 24)

Q. 2 Answer any EIGHT parts briefly.

(8 x 3 = 24)

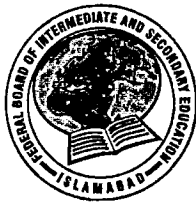

- (i) Differentiate between prokaryotic and eukaryotic cells.
- (ii) Briefly explain the structure and function of endoplasmic reticulum.
- (iii) Draw the structural formula of the following:
 - (i) Butene (ii) Pantanol (iii) Hexane
- (iv) Explain briefly the role of pituitary hormones.
- (v) What is neuron? How are they classified?
- (vi) Describe the formation of chemical ionic bond in MgO .
- (vii) What is meant by "isotope"? How isotopes can be used in various fields of life?
- (viii) Write difference between 'Artery' and 'Vein'.
- (ix) Nasal Cavity plays an important role in respiration. How?
- (x) Identify Bronsted acids and bases in the following:
 - (i) $H_2SO_4 + H_2O \rightleftharpoons HSO_4^- + H_3O^+$
 - (ii) $CH_3COOH + H_2O \rightleftharpoons CH_3COO^- + H_3O^+$
 - (iii) $H_2S + NH_3 \rightleftharpoons NH_4^+ + HS^-$
- (xi) Which digestive enzymes are secreted in the small intestine?

SECTION – C (Marks 16)

Note: Attempt any TWO questions.

(2 x 8 = 16)

- Q. 3 Describe the structure as well as function of nephron in human urinary system. Also draw a neat and labelled diagram of nephron.
- Q. 4
 - a. Write a note on human's brain.
 - b. Explain the formation of covalent bond in CH_4 .
- Q. 5
 - a. Explain different stages of mitotic division with the help of diagram.
 - b. What is the significance of mitosis in our life? (Any two)
